Remove Proxmox 6.0/5.1+ Subscription Notice

With the release of Proxmox 5.1 and newer (including 6.0) you'll find the code related to the no subscription message that pops up on login has changed and prior instructions for removing it wont work.

To remove "You do not have a valid subscription for this server" run the command bellow. You will need to SSH to your Proxmox machine or use the node console through the PVE web interface.

Run the following **one line command** and then clear your browser cache (depending on the browser you may need to open a new tab or restart the browser):

```
sed -i.bak "s/data.status !== 'Active'/false/g" /usr/share/javasc
```

Here are **alternative** step by step instructions so you can understand what the above command is doing:

1. Change to working directory

```
cd /usr/share/javascript/proxmox-widget-toolkit
```

2. Make backup of file

```
cp proxmoxlib.js proxmoxlib.js.bak
```

3. Edit the file

```
nano proxmoxlib.js
```

4. Locate this line of code inside the file (use ctrl+w in nano)

```
if (data.status !== 'Active') {
```

5. Replace it with this

```
if (false) {
```

6. Restart the Proxmox service (also be sure to clear your browser cache, depending on the browser you may need to open a new tab or restart the browser)

```
systemctl restart pveproxy.service
```
